1 System introduction

Simple But Not Ordinary

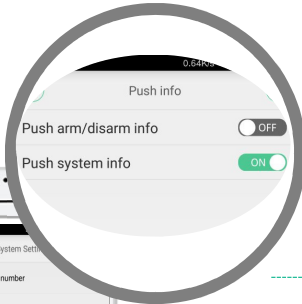

WiFi/GPRS/SMS Alarm System

HY-W20 alarm system adopts the up-to-date digital sensors and transfer technology, which integrates burglar and fire/gas protection for smart alarm system. Users can remotely control and program the alarm host Via APP. It also supports multiple languages. The system adopts WIFI/GPRS/SMS wireless network digital signal processing technology. When alarm happens, it will send alert by voice, information push, pop-up alarm on screen. W20 Alarm System is a advisable choice for personal house, working office and factory with fashionable appearance and multi-functionals.

2 Main Features

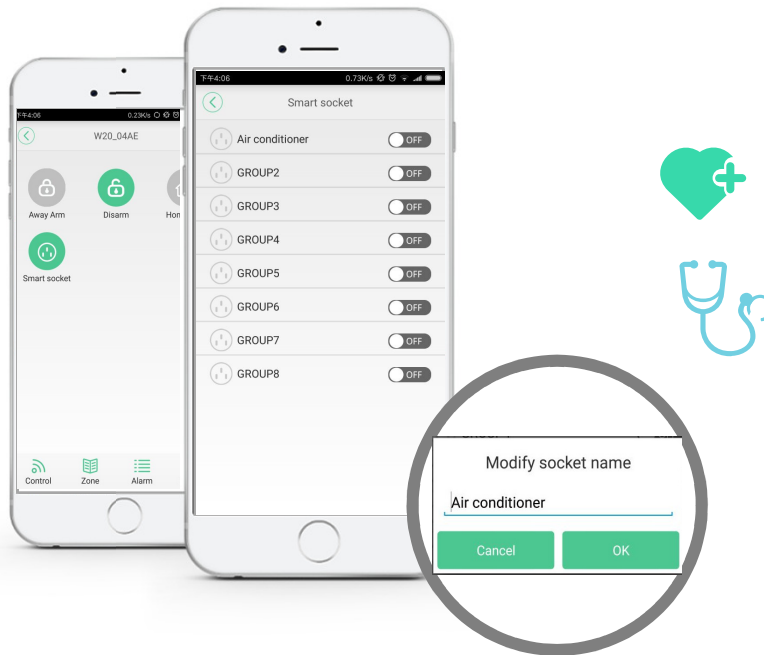

Multi-Language

Smart Sharing

Push Information

**Support 8 Groups of Smart
Sockets**

**Smart Sockets' name can be
modified**

Open/Close Door Function

Open/Close Door: In order to avoid arming failure when door/window is open or closed, users can freely choose the door open/closed function for any zones. When door open/close setting is enabled, panel host cannot arm those detectors until door/window is closed.

Force Arm: When users want to arm the zones with open door/window, force arming is needed. Once force arming setting is enabled, those detectors cannot triggered until door/window is closed.

Smart Sockets

Smart sockets can control the power of electrical devices over network.
You can control the on/off states through your mobile phone
from anywhere with a network connection.

Smart sharing

Sharing operations as different control authorization with
your family whatever is best choice for you.

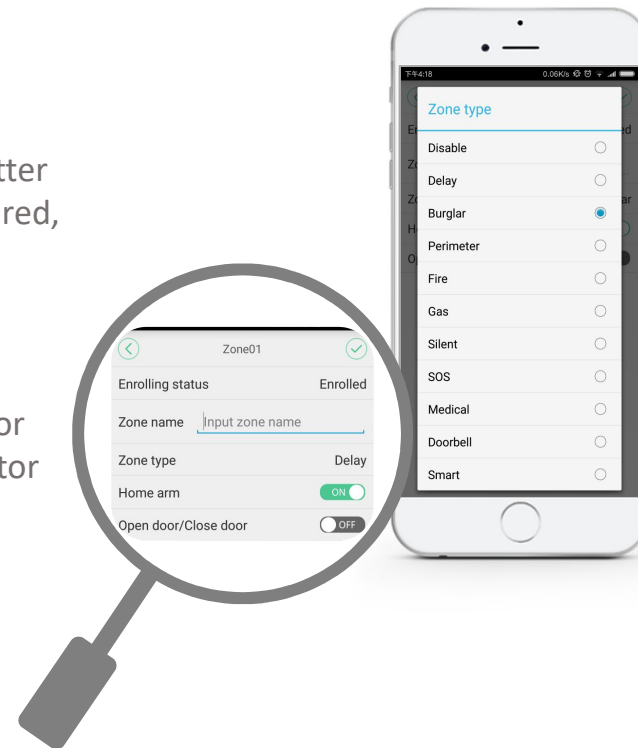

More intelligent and more convenient

11 Kinds of Zone Types for You

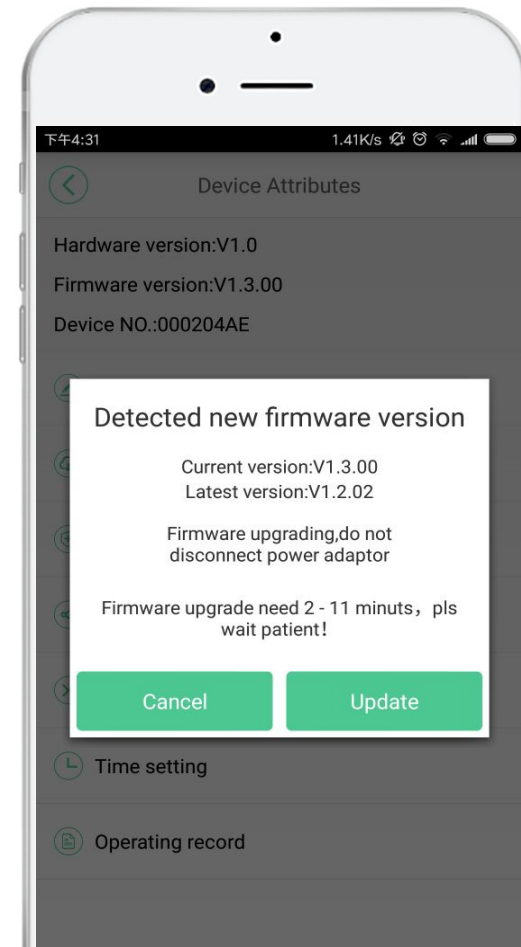

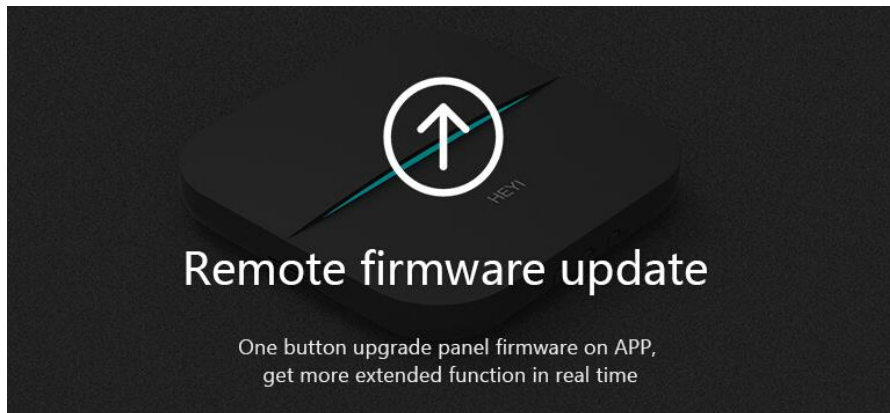

Doorbell Zone: It is similar with Day-night zone type. No matter under arming or disarming status, when detectors are triggered, panel will beep “ding dong”, but not output alarm voice.

Smart Zone: The host won't ring alarm at once when detector in the zone get triggered by 1 time, it will ring alarm if detector get triggered again in the same zone within 40S

The unique function

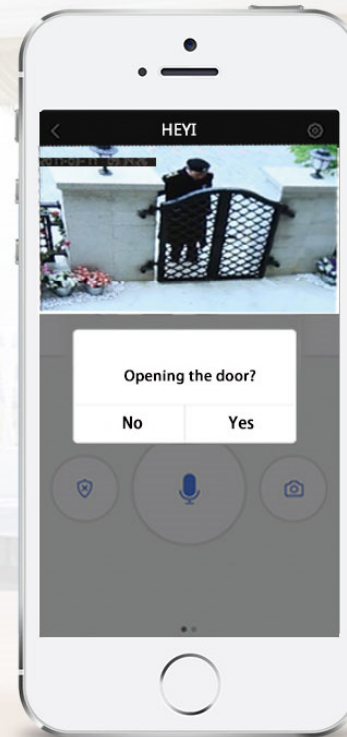

- Support remotely updated the firmware by APP software.
Get more extended function in real time

Three Network for Best Security
Input SIM card for alarm calling and SMS notice.
GPRS network will replace Wi-Fi when losing Wi-Fi connection.

- **Remote Monitoring/Speaking**
Real-time access to query the alarm information and the situation at home without missing.
(Visual doorbell)
